

Industry Leading Protection for Your Equipment Investment

Maximize Equipment Uptime and Peak Performance Levels

Every day you count on Zetec products to deliver an inspection advantage: optimizing productivity and safety while lowering total cost of ownership. You invested in Zetec technology to gain new levels of insight and control. Protect your investment with a Zetec Complete Care Plan.

We know how critical NDT inspections are to your operations. Many times you can't afford to have inspection delays or stoppages. With Zetec Complete Care Plans, you can ensure that your Zetec-branded inspection products are continually achieving maximum uptime and peak performance levels. Choosing a complete care plan means you will have access to unmatched support, from experts with unparalleled product knowledge. Features include on-site service, global technical support, an equipment loaner program, priority turnaround time and more. Zetec Complete Care Plans will ensure that your equipment continues to deliver that *inspection advantage* for years to come.

Choose The Plan That Meets Your Needs

With three plans to choose from – Basic, Advanced and Premier–there is a Zetec Complete Care Plan designed to meet your specific support requirements and budget. With a footprint that includes local service centers around the globe, Zetec is ready to meet your needs, no matter where your operations are located. Choose from these plans:

Basic

The Basic Plan provides a complete parts and labor warranty ensuring your equipment stays in excellent working condition. Additionally, it includes preventative maintenance, security updates and firmware updates when applicable, keeping your equipment running at a peak performance level. To ensure quality assurance requirements are met, the plan includes calibrations* of the essential parameters and certifications for your instruments and equipment.

* Zetec as the OEM provides calibration and repair services for all our equipment with service centers strategically located around the globe. Our laboratories meet or exceed all requirements for compliance with ISO/IEC 17025:2005. All calibrations are traceable to the National Institute of Standards and Technology (NIST) or the National Research Council of Canada (NRC) or to other recognized national or international (NMIs).

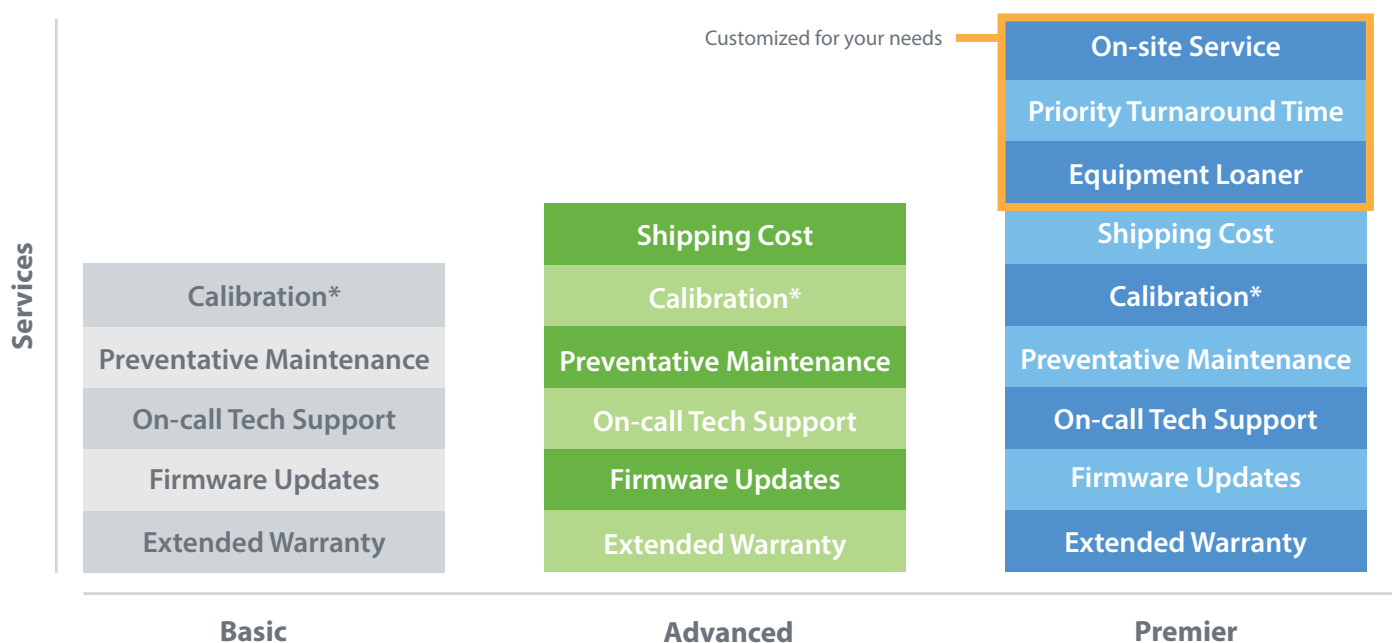

Advanced

The Advanced Plan includes all the benefits of the Basic Plan, plus the equipment roundtrip transportation fees. This plan facilitates budget management and efficiency providing excellent service at no additional cost. It provides complete dock-to-dock service with minimal requirements.

Premier

The Premier Plan includes all the benefits of the Basic & Advanced Plans, plus customization to fit your needs. This Plan is intended to provide excellent on-site technical support, access to loaner equipment, transportation fees coverage, and priority service to improve turnaround times. The Premier Plan strives to provide the specialized service necessary to meet all your business needs.
