

## Industry Leading Protection for Your Equipment Investment

### Maximize Equipment Uptime and Peak Performance Levels

---

Every day you count on Zetec products to deliver an inspection advantage: optimizing productivity and safety while lowering total cost of ownership. You invested in Zetec technology to gain new levels of insight and control. Protect your investment with a Zetec Complete Care Plan.

---

We know how critical NDT inspections are to your operations. Many times you can't afford to have inspection delays or stoppages. With Zetec Complete Care Plans, you can ensure that your Zetec-branded inspection products are continually achieving maximum uptime and peak performance levels. Choosing a complete care plan means you will have access to unmatched support, from experts with unparalleled product knowledge. Features include on-site service, global technical support, an equipment loaner program, priority turnaround time and more. Zetec Complete Care Plans will ensure that your equipment continues to deliver that *inspection advantage* for years to come.

### Choose The Plan That Meets Your Needs

With three plans to choose from – Basic, Advanced and Premier – there is a Zetec Complete Care Plan designed to meet your specific support requirements and budget. With a footprint that includes local service centers around the globe, Zetec is ready to meet your needs, no matter where your operations are located. Choose from these plans:

\* Zetec as the OEM provides calibration and repair services for all our equipment with service centers strategically located around the globe. Our laboratories meet or exceed all requirements for compliance with ISO/IEC 17025:2005. All calibrations are traceable to the National Institute of Standards and Technology (NIST) or the National Research Council of Canada (NRC) or to other recognized national or international (NMI's).

## Basic

The Basic Plan provides a complete parts and labor warranty ensuring your equipment stays in excellent working condition.

## Advanced

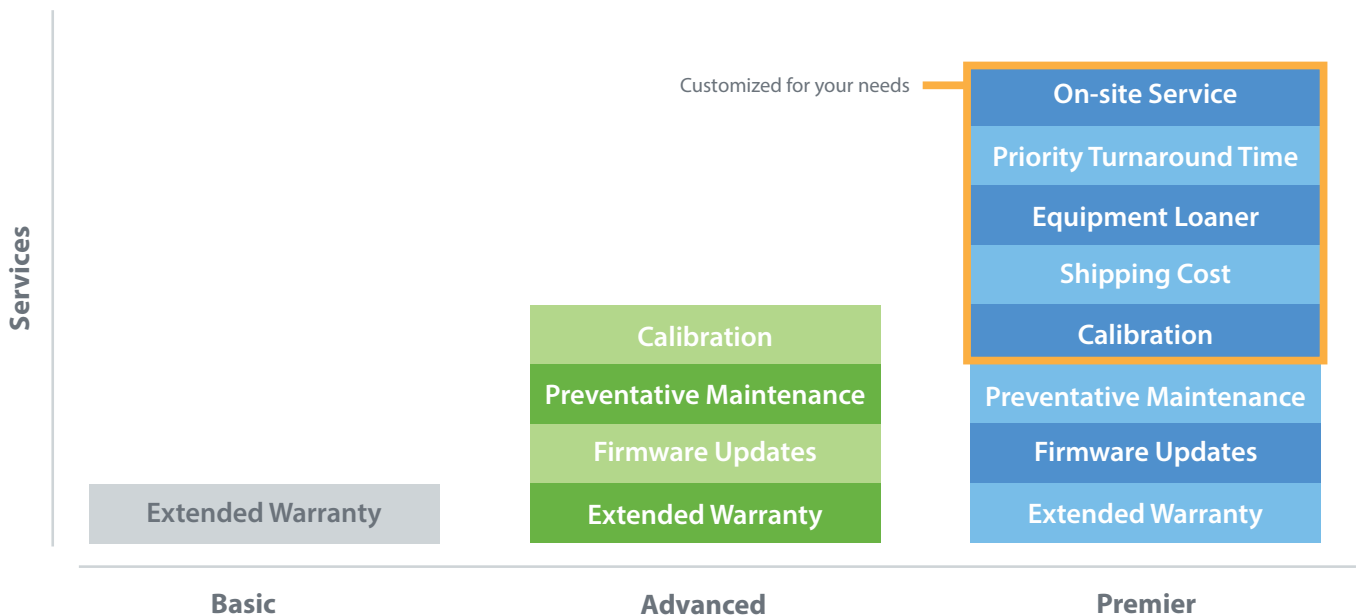

The Advanced Plan provides a complete parts and labor warranty ensuring your equipment stays in excellent working condition. Additionally, it includes preventative maintenance, security updates and firmware updates when applicable, keeping your equipment running at a peak performance level. To ensure quality assurance requirements are met, the plan includes calibrations of the essential parameters and certifications for your instruments and equipment.

This plan includes one calibration during the original warranty and one calibration within each purchased ZCC Plan year.

## Premier

The Premier Plan is custom designed to fit your needs. All to ensure quality assurance requirements are met and to keep your equipment running at a peak performance level, options as extended warranty parts & labor and/or instruments and equipment calibrations certifications are considered. Additionally, it includes preventative maintenance, security updates and firmware updates when applicable. Other available options may include: on-site technical support, access to loaner equipment, transportation fees and priority service to improve turn-around-times.

## Zetec Complete Care Plan Features

Zetec as the OEM provides calibration and repair services for all our equipment with service centers strategically located around the globe. Our laboratories meet or exceed all requirements for compliance with ISO/IEC 17025:2005. All calibrations are traceable to the National Institute of Standards and Technology (NIST) or the National Research Council of Canada (NRC) or to other recognized national or international (NMIs).
